

Coercive Subtyping via Logic Programming for Painless Mendler-style Algebraic Programming

HENRY BLANCHETTE, The University of Maryland, USA

AARON STUMP, Boston College, USA

TODO: abstract

CCS Concepts: • **Software and its engineering** → **Functional languages**; *Recursion*.

Additional Key Words and Phrases: strong functional programming, type-based termination, Mendler-style recursion

ACM Reference Format:

Henry Blanchette and Aaron Stump. 2026. Coercive Subtyping via Logic Programming for Painless Mendler-style Algebraic Programming. 1, 1 (May 2026), 1 page. <https://doi.org/10.1145/nnnnnnn.nnnnnnn>

- 1 **Introduction**
- 2 **Motivating example**
- 3 **Syntax**
- 4 **Constraint-Generating Typing**
- 5 **Subtyping**
- 5.1 **Declarative**
- 5.2 **Algorithmic**
- 5.3 **Equivalence of declarative and algorithmic subtyping**
- 6 **Implementation with Chronolog**
- 7 **Returning to the Examples**
- 8 **Conclusion and future work**
